

Ossiam ESG Low Carbon Shiller Barclays CAPE® US Sector UCITS ETF 1A (USD)**STRATEGY DESCRIPTION**

The Ossiam ESG Low Carbon Shiller Barclays CAPE® US Sector Strategy aims to deliver a risk/return profile similar to the Shiller Barclays CAPE® US Sector Value index, but with a significantly reduced carbon footprint and improved ESG profile.

The Shiller Barclays CAPE® US Sector Value strategy is a systematic value-oriented approach based on Professor Robert Shiller's research. The strategy offers US equity exposure through a sector selection approach based on the Cyclically Adjusted Price to Earnings (CAPE®) ratio in order to select potentially undervalued sectors. The strategy is designed to offer large cap equity market exposure with a value bias and is suitable for buy-and-hold investors with a multi-year time horizon.

Improved ESG profile : The strategy excludes companies involved in controversial weapons, tobacco, coal and controversies regarding environmental, social and governance topics.

Reduced Carbon Footprint : The strategy compared to its original index targets a reduction of 40% for total greenhouse gas emissions (GHG), carbon intensities (GHG / company revenues) and GHG emissions from fossil fuel reserves.

Key benefits:

- Exposure to US equities through a sector selection approach based on the CAPE® ratio
- A widely used valuation metric based on the works of Professor Shiller
- An investment process seeking to identify sectors potentially undervalued in the long term
- An approach which combines ESG filters with greenhouse gas emissions reduction

Performance is not shown as the fund has a performance history of less than 1 year.

SYNTHETIC RISK & REWARD INDICATOR

The SRRI represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRRI is not guaranteed and may change over time.
